

01 • PHYSICAL ENTRY POINT

Start with the standee

The customer sees one branded standee with two ways to reach the business.

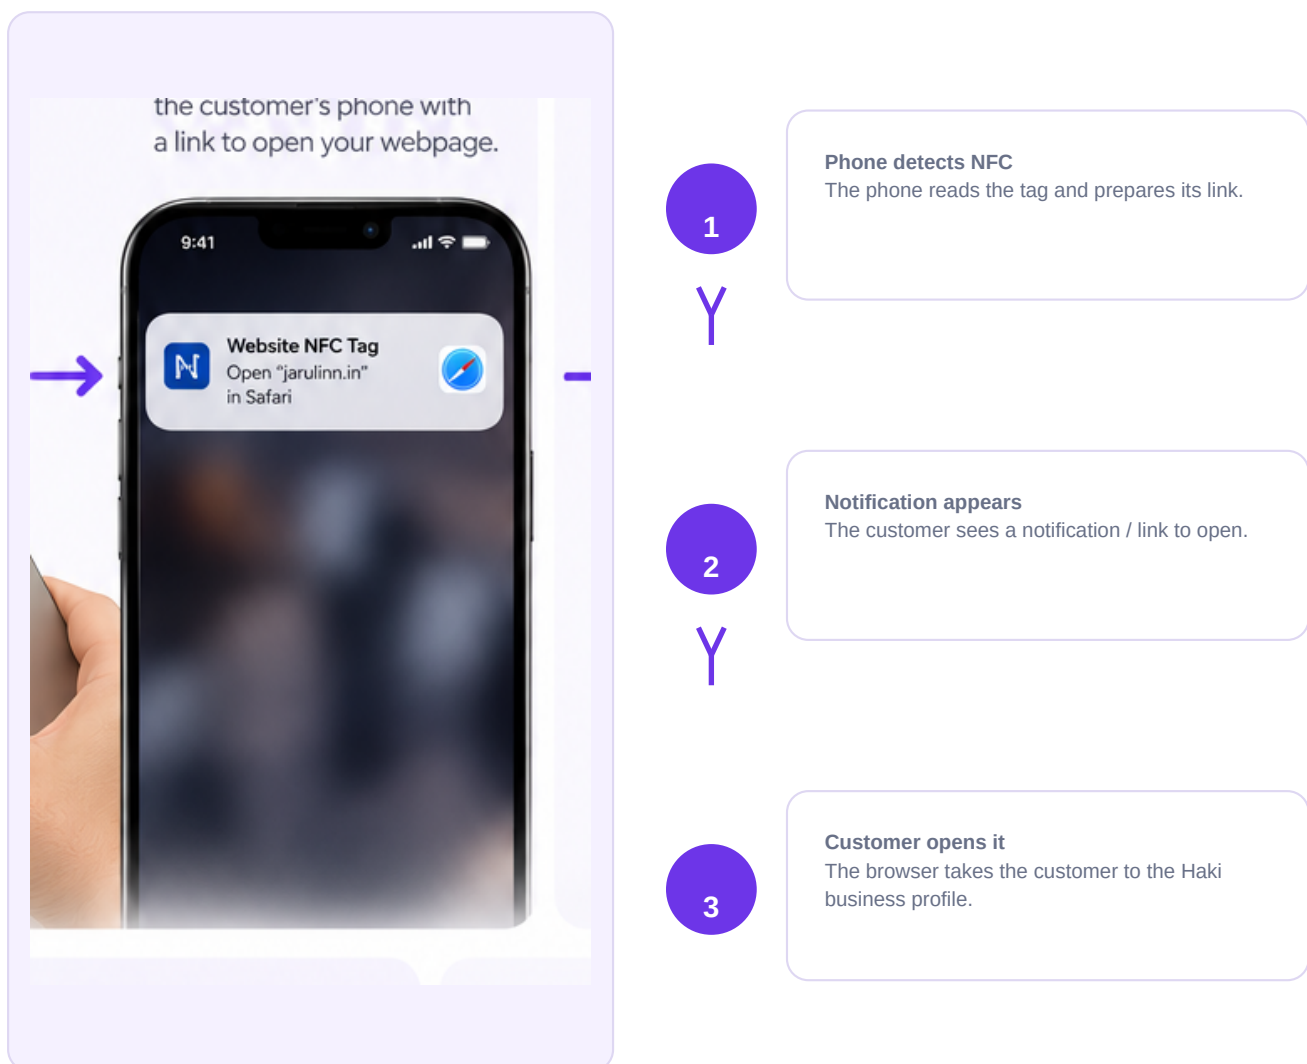

One standee → NFC tap OR QR scan → one digital destination.

02 • NFC HANDOFF

Tap → notification → open

Here is the exact bridge between the physical standee and the webpage.

No app download. The NFC tag simply points the customer's phone toward the business's web destination.

03 • DIGITAL DESTINATION

The business webpage

The customer lands on one branded page instead of hunting through separate links.

What the business can place here

- **CALL** Direct contact
- **WHATSAPP** Bookings / enquiries
- **MENU** Digital menu
- **INSTAGRAM** Social profile
- **WEBSITE** Official website
- **GOOGLE REVIEW** Review page

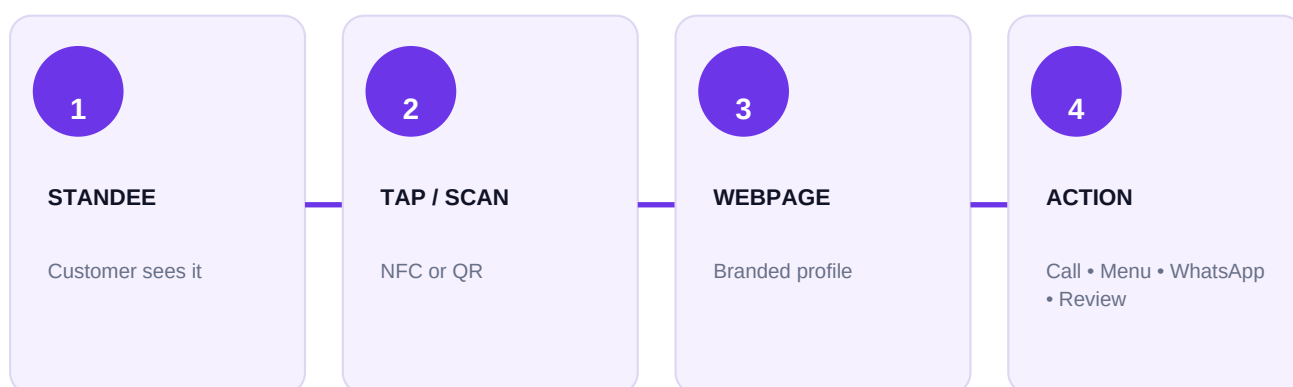

Only show what the business needs.

Menu, booking, WhatsApp, Instagram, website, reviews and more.

04 • END-TO-END JOURNEY

From a table tap to a customer action

The physical standee becomes the front door to the business's digital presence.

What Haki adds for the business

Physical touchpoint → Digital profile → Customer action → Business insight

A simple customer journey, built around the business.
